Mohammad Ibrahim Saleem

Summer Intern @NOV | Researcher @University of Houston | 3x Engineer (GenAI-Driven) | MS Cybersecurity | B.Tech CS | Agentic AI & AI for Cybersecurity | GenAI | Network & Cloud Security | Open to Fall 2025 Co-Ops

Houston, Texas, United States

Summary

Hi, I'm Mohammad Ibrahim Saleem, a Cybersecurity graduate student at the University of Houston with a GPA of 4.0 and hands-on experience in incident response, detection engineering, and offensive security. My passion for enhancing digital safety and security drives my commitment to building robust solutions in the cybersecurity landscape.

As a Research Assistant at the University of Houston's Smart Systems Security Laboratory, I develop secure IoT pairing systems for automotive environments, leveraging unencrypted TPMS signals to enhance data confidentiality and reliability. My work incorporates cryptographic designs and digital signal processing, ensuring cutting-edge advancements in IoT security.

Previously, I honed my skills as an Associate Software Engineer at Nagarro Software Pvt. Ltd., where I designed secure web applications using C#, ASP.NET Core, and Angular. My work included creating incident response playbooks for automated threat detection and remediation, integrating tools like Cortex XSOAR, QRadar, and Google Chronicle to accelerate SOC investigations.

During my tenure as a Cybersecurity Intern with the Cyber Cell MP Police, I analyzed cybercrime patterns, enhanced system security by identifying vulnerabilities, and conducted awareness training sessions for over 500 individuals on cybercrime and network security fundamentals.

My technical expertise spans Python, C#, MATLAB, SQL, and frameworks such as Splunk, MITRE ATT&CK, and Cortex XSOAR. I specialize in detection response automation, anomaly detection,

and threat hunting, with certifications including ISC2 Certified in Cybersecurity (CC) and Cisco Cybersecurity.

Some of my notable projects include:

- Splunk-Based Detection and Response Automation: Built real-time dashboards to detect anomalies, integrated IP reputation analysis, and automated threat classification.
- Cybersecurity Tools & Awareness Platform: Created an interactive platform showcasing 30+ cybersecurity tools for beginners, promoting safe internet practices.

With a strong foundation in offensive security, software engineering, and network security, I am actively seeking roles in Detection and Response, Incident Response, and Offensive Security. I am eager to collaborate with innovative teams to build solutions that safeguard organizations from ever-evolving cyber threats.

Let's connect to discuss opportunities where I can contribute my skills to drive impactful cybersecurity initiatives!

Experience

NOV

GenAI & Data Science Intern

June 2025 - Present (2 months)

Houston, Texas, United States

Building internal GenAI tools and intelligent agents to automate workflows, enhance decision-making, and improve operational efficiency. Focused on LLM integration, prompt engineering, and scalable AI pipelines for enterprise use cases.

Women In Cybersecurity at University of Houston (WiCyS UH)

Outreach Officer (Volunteer)

May 2025 - Present (3 months)

Houston, Texas, United States

University of Houston

11 months

Research Assistant (AI in Cybersecurity)

January 2025 - Present (7 months)

Houston, Texas, United States

Built PentestThinkingMCP, an advanced MCP server for automated attack planning and tool selection in penetration testing. Integrated it into an agentic pentest framework with LLMs, CUAs, and other MCPs for end-to-end automated recon and exploitation. Achieved initial access 77% faster than experts penetration tester and 96% faster than average testers using Claude 3.5 Sonnet and PentestThinkingMCP.

Research Assistant (Information Security)

September 2024 - February 2025 (6 months)

Houston, Texas, United States

Contributed to developing a secure IoT device pairing system for automotive environments using MATLAB and Python, under faculty guidance. The system leverages unique in-vehicle signals—like TPMS data and voltage variations—for password-less pairing between mobile and IoT devices. Assisted in signal experiments, randomness analysis, and research paper drafting.

Conceptech Solutions

Software Engineer

March 2024 - August 2024 (6 months)

Dubai, United Arab Emirates

Led a team in developing secure, customized web solutions using React.js, Angular.js, HTML, CSS, and JavaScript. Collaborated with clients, implemented security best practices, ensuring performance, resilience, and timely delivery.

Nagarro

Associate Software Engineer Trainee

February 2023 - February 2024 (1 year 1 month)

Delhi, India

Developed secure web applications using C#, ASP.NET Core, and Angular, focusing on authentication, access control, and performance optimization. Designed RESTful APIs to improve system integration and security, implemented robust database security protocols, and conducted threat modeling with MITRE ATT&CK.

Cyber Cell Mp police

Cyber Security Research Intern

June 2022 - February 2023 (9 months)

Bhopal, Madhya Pradesh, India

Researched city-specific cybercrimes, analyzed website vulnerabilities using Python for risk mitigation, and conducted cybersecurity training for 500+ individuals to enhance public awareness.

Dolphinox Technologies Pvt Ltd

Python Developer Intern

June 2022 - October 2022 (5 months)

Bhopal, Madhya Pradesh, India

Participated in the entire Software Development Life Cycle, employing Python and Django for back-end development, and HTML, CSS, and JavaScript for front-end tasks in projects like Employee Management Software. Designed ER diagrams, Regular Expressions, and crafted SQL queries for seamless CRUD operations.

AplyEase

Associate Founder

2022 - October 2022 (less than a year)

Freelance

Freelance Web Developer

November 2017 - September 2022 (4 years 11 months)

Recently Developed websites for clients:

Conceptech Solutions - <https://conceptechsolutions.com/>

Icecream store - <https://cream-dream.web.app/>

Catrerer business - <https://jawahartenthouse.in/>

World Cyber Security Forum (WCSF)

Campus Ambassador/Content Writer

April 2022 - June 2022 (3 months)

Remote

Led cybersecurity sessions and content initiatives in my college, helping 300+ students understand cyber safety. Created tutorials, blogs, and news articles on topics like testing techniques, cyber attacks, viruses, and cyber laws to raise awareness and improve cybersecurity literacy among peers.

CS Mock

Campus Manager

January 2022 - March 2022 (3 months)

Remote

In my capacity as a Campus Ambassador, I undertook various responsibilities aimed at fostering engagement with the CS Mock platform. These duties encompassed conducting surveys within the college environment, providing guidance to individuals on interview preparation through utilization of the CS Mock platform, and bolstering the platform's standing by actively representing it within the college community.

Education

University of Houston

Master of Science - MS, Cybersecurity · (August 2024 - August 2026)

Rajiv Gandhi Prodyogiki Vishwavidyalaya

Bachelor of Technology - BTech, Computer Science · (2019 - 2023)

St. Joseph's Co-Ed School

12th · (2007 - 2019)
